Summary

Full Stack Web Developer experienced in react.js, JavaScript, jQuery, node.js, express.js & AJAX utilising skills developed in agile environments to build complex web apps with a seamless user experience. Graduate from Monash Universities Full Stack Web Development Bootcamp. My passion for developing responsive, clean web apps has allowed me the opportunity to work on developing and deploying custom built NetSuite scripts to automate processes which drive a better user experience for my stakeholders allowing them to focus on their core role tasks over manual tasks. I'm thrilled to leverage my newly developed skills to continue to deliver automated solutions and better user experiences.

Technical Skills

Languages:

- react.js
- JavaScript
- jQuery
- node.js
- express.js
- AJAX
- HTML5
- CSS3
- SQL
- mongoDB

Applications:

- WordPress
- MySQL
- Google Analytics
- Bootstrap

Projects

A Better Time | GitHub Repo: <https://github.com/darren-behan/a-better-time> | Deployed App: <https://darren-behan.github.io/a-better-time/>

The brief of this project was to produce an application that's tech stack would consist of a modern CSS framework, server-side API's and be interactive. The development of API logic through AJAX & jQuery to display the relevant content based on the user's selection was the role played by myself along with rigorous testing and reviewing of all team members commits.

Project 2 | GitHub Repo: <https://github.com/darren-behan/a-better-time> | Deployed App: <https://darren-behan.github.io/a-better-time/>

Experience

NetSuite ERP Support Coordinator REA Group

March 2019 – Current
Melbourne

The core function of my role is to oversee the maintenance of the company's ERP system, NetSuite whilst continuously seeking opportunities to improve processes & implement systems enhancements.

- Developing SuiteScripts powered by ES5 & ES6 along with test scripts utilizing the Jasmine framework.
- Translating business requirements into clear, concise, testable and accurate user stories & process flows.
- Ensuring that requirements are understood through story kick-offs and constant communication using a variety of analysis and documentation techniques including the application of visualization techniques to underpin a joint understanding of processes and data.
- Coordinate NetSuite upgrades including development and execution of test cases to ensure upgrades occur without any business disruption.
- Maintain/Update NetSuite/Adaptive account and organization structures, workflows and processes.

Accounts Payable Officer REA Group

August 2018 – March 2019
Melbourne

The key functions of my role were as follows:

- Process all new & existing invoices requiring payment by directing these to the relevant requisitioners.
- Performing bi-weekly domestic & International pay runs for a multi subsidiary organisation.
- Generating data for processing of monthly accruals throughout the organisation.
- General support for the Accountants & Accounts Receivables teams with loading journals and receipting of customer payments.

Credit Controller REA Group

August 2017 – August 2018
Melbourne

The key functions of my role were as follows:

- To manage a ledger of 2,800+ accounts ensuring the daily sales outstanding is kept within the KPI's set for the Credit team.
- Liaised with key stakeholders to implement Zendesk replacing a legacy system.
- Utilised the Finance System (NetSuite) to maintain customers' accounts such as processing payments & generating invoices.
- Advocate for driving change to outdated & manual processes within the Credit team.

Education

Monash University Full Stack Coding Bootcamp 2020

A 24-week intensive program focused on gaining technical programming skills in HTML5, CSS3, Javascript, JQuery, Bootstrap, Firebase, Node Js, MySQL, MongoDB, Express, Handelbars.js & ReactJS.

Bachelor of Business (Honours) Degree in Accounting, Institute of Technology Carlow - 2006-2011
